

# FY25 Clayton Utz Greenhouse Gas Assessment

## Executive Summary

Foresight was engaged by Clayton Utz to conduct a comprehensive assessment of the Scope 1, 2 and 3 greenhouse gas (GHG) emissions generated by Clayton Utz's Australian operations for the 2025 Financial Year.

### Outcomes:

Scope	Key inclusions:	Emissions (t.CO2e)
Scope 1	Natural gas & refrigerants	34
Scope 2	Electricity (market-based)	462
Scope 3	Category 1 to 8	18,279.64
<b>Total</b>		<b>18,775.61</b>

Foresight is committed to continuing to support Clayton Utz's climate disclosures and broader sustainability journey. Clayton Utz's Scope 1, 2 and 3 GHG emissions inventory was prepared in alignment with the *GHG Protocol Corporate Standard*. This included an assessment of relevant GHG emissions across the Standard's 15 Scope 3 emissions categories. To support continued alignment, the relevant sources of value chain emissions will be reviewed annually, and a data management strategy will support the improvement of underlying data to ensure the emissions inventory reflects industry best-practice.

Clayton Utz provides comprehensive disclosure of Scope 1, Scope 2 and Scope 3 emissions in alignment with the GHG Protocol, strengthening their commitment to enhancing the transparency and quality of its sustainability disclosures.

### Ongoing work

Measuring and understanding the full emissions footprint enables Clayton Utz to track year-on-year changes, identify priority areas for reduction, and enhance the accuracy of its reporting. This level of disclosure strengthens transparency for stakeholders, supports robust benchmarking against sector peers, and reinforces accountability across the business.

This work aligns with Clayton Utz's commitment to developing a sustainability and decarbonisation strategy aimed at reducing its carbon footprint. Foresight supports Clayton Utz on this journey by providing clear emissions insights, identifying targeted reduction opportunities, and helping translate data into practical, actionable pathways that drive measurable impact.

Clayton Utz retains full responsibility for the accuracy, completeness, and validity of all data provided, which forms the basis of the calculation and results presented.
